## Introduction

Since 2014 Swedish Association of Local Authorities and Regions has driven Flagship School to Work in the Baltic Sea Region. Today, Flagship is a network of 62 members from eight countries and a platform for raising awareness and sharing of information.

Our members develop and implement methods that prevent early school leaving, help young people to find their way back to active social life, school and even in workplaces. Our members know that changes are needed and are ready to learn from each other in order to offer better activities and services.

We welcome you to participate in the activities of the network and learn more from each other during this study visit!
